Job Opportunity – Revit Expert – Full-Time Employment
May 17, 2012

K’nowbe Works, LLC, provides turnkey water, wastewater and environmental solutions to clients in the energy and land development sectors. Our goal is to become part of our clients’ competitive advantage by applying innovation, leadership and our understanding of the entire life-cycle of our clients’ investments. We accomplish this goal by partnering with leading providers of intellectual and financial capital.

K’nowbe Works, LLC, has an immediate opportunity for a full-time, Revit expert based in the Salt Lake area. If you have a passion for all things Revit and would like to establish yourself as a capable 3D modeler and designer, then K’nowbe Works, LLC, is interested in you. We are strongly committed to developing talent and rewarding achievement. Come grow with us at K’nowbe Works, LLC.

Minimum Requirements/Qualifications:

- Proficient with Revit, Navis Works, and other 3D modeling tools
- Revit Routing, Piping background, parametric modeling and knowledge of design-table configurations is a plus
- Pipe Drafting/Industry Knowledge, construction-management tools, HVAC, buildings and civil a plus
- Proficient in the use of SQL databases
- Building construction and management degree or equivalent
- Self-disciplined and motivated to work without direct supervision.

Job Type - Full Time
Location – 2233 S. Presidents Dr. (3850 West), Suite F, West Valley City, UT, 84120

Description:

- Create 3D parts and building models using Revit. Work closely with engineers to ensure design intent is captured in models and on drawings and that quality and efficiency is maintained in a largely unsupervised environment. Work environment would require employee to be self-motivated and able to work without direct supervision.
- Create new 3D models of parts, components and buildings, etc.
- Detail equipment and assemblies for fabrication and construction, including layout, structural steel, and piping, HVAC, facilities, buildings, campuses, etc.
- Maintain complete change history on drawings and models.
- Create design tables of multiple design configurations.
- Work closely with engineering/design software-programming personnel to extend the function of Revit via custom plug-ins.

Position Type:
Full Time - Modeling Team Office Environment

Other:
All applicants are required to complete a written competency test to assess skill level.
