Mechanical Engineering Position:

Millcreek Engineering Company is hiring Mechanical Engineers. Positions are open to Mechanical Engineering students or recent graduates. Position involves engineering work for bulk material handling facilities, mining and power generation projects. Millcreek Engineering designs complete facilities with engineers from multiple disciplines and utilizes the latest 3D modeling software. A wide variety of work includes design of conveyor belts, integration of heavy industrial equipment, HVAC, dust collection and piping systems. Millcreek Engineering is flexible with school schedule and provides an opportunity for full time employment upon graduation.

Resumes can be emailed to heatherj@millcreekeng.com

Primary Industries Served:
- Power Generation
- Coal (PRB Experts)
- Limestone
- Cement
- Precious Metals
- Fertilizers
- Coke
- Refineries
- Salt/Potash
- Trona
- Chemical

Our Portfolio includes:
- Coal Blending Systems
- Overland Conveying
- Crushing and Screening
- Dust Suppression
- Truck Dump Unloading, Truck Loading
- Rail Unloading and Loading
- Batch and Unit Weighing
- Slurry Systems Piping
- Industrial Drainage
- Rail Design
- Marine Transloading Facilities
