4-Speed Crank Axle Gearbox
By altering the combination of four gears, four different gear ratios can be obtained: 126:1, 441:1, 1543:1 and 5402:1. These low output speeds are best suited when a high torque is required as opposed to speed. Comes with a 130 type electric motor, and a pair of crank arms for numerous applications.

High Power Gear Box
Designed for high torque output and is suitable for constructing models such as tanks, buggies, tracked vehicles etc. The gear box allows 2 gear ratios, 41.7:1 and 64.8:1, to be selected. The gear case is injection-molded and the gears are of polyacetal resin for reducing mechanical noise. Operates at 3V DC. RPM 15100.

High Speed Gear Box
This versatile and easy-to-construct gear box broadens the world of handicrafts. The gears are of polyacetyl resin, which permit efficient power transmission with less mechanical noise than metal gears. Two (2) gear ratios, 11.6:1 and 18:1, can be selected by altering the gears. Operates at 3V DC. RPM 15100.

Tower Hobbies System 3000 Standard Servo
FEATURES: Universal servo connector works with most currents radios systems
(see COMMENTS).
One Year Warranty.
INCLUDES: One Tower Standard Servo with Universal Connector.
One Servo Accessory Bag with mounting grommets and eyelets,
2-X shape servo arms 1.5” across, 1-servo wheel 1-3/8” in diameter,
1-star shaped arm 1-1/4” across shaped like.
SPECS: Torque: 42 oz/in
Speed: .22 sec/60 degree
Weight: 1.5 oz
Length: 1.59”
Width: 0.77”
Height: 1.41”
