The image contains a flowchart of the curriculum structure for a program, possibly in engineering. The flowchart is divided into different years with courses listed for each semester. The courses include both required and elective options, along with prerequisites and co-requisites. There are also notes on Gen. Ed. Reqs., Major requirements, and specific stipulations for courses such as lab included, fall, or summer tentative, and concurrent or subsequent requirements. The flowchart provides a visual representation of the course sequence over five years, with courses marked with their credit hours and a logical flow from one semester to the next. The document also includes general education requirements and notes on admission and graduation requirements, along with continuing performance criteria. The bottom of the image includes a disclaimer about course availability and prerequisites subject to change.
